4.2.2

Welcome to My HTML Page

- [Section 1](#)
- [Section 2](#)
- [Section 3](#)

Article Title

This is a paragraph in an article section. It demonstrates text formatting, like **bold**, *italic*, and **marked text**.

Here's a quotation:

This is a blockquote, a section that quotes content from another source.

The article section typically contains text, images, and other content that forms an independent part of a document.

List Examples

Ordered List:

1. First item
2. Second item
  1. First item
  2. Second item
  3. Third item
3. Third item

Unordered List:

- Bullet item
  - Bullet item
  - Another bullet item
- Another bullet item
- Yet another bullet item

Additional Elements

This section includes a variety of additional HTML elements:

Definition Lists:

A list where each item has a term and definition.

- HTML  
Hypertext Markup Language.
- CSS  
Cascading Style Sheets

Tables:

Here is an example of a table:

Monthly Sales Report		
Month	Sales	Expenses
January	\$2000	\$1500
February	\$1800	\$1200
Total	\$3800	\$2700

### 5.2.3.e

As I open my html file and test my back links, some of them worked but some of them did not. Since we used two different types of src for the hyperlink,

1. `<br><a href="index.html">Back to Home</a>`
2. `<br><a href=".">Back to Home</a>`

Number 1 worked since I opened them from my local folder, the exact location of file needed.

Therefore, number 2 does not work on local folder.

Source: From the lecture.

---

### 5.2.3.f

All of them work since this time we opened the index.html through local host server, the specific location of the file does not need to be redirected to home.

Source: From the lecture.

---
